

Connecting to ECmobile from a Mac OS X Computer

Connecting to ECmobile is a simple process for Mac OS X. Before attempting to connect, please make sure that your operating system is up to date. You will need Mac OS X 10.3.9 or higher and have the latest drivers for your wireless card. If this is your first time connecting to our new ECmobile service you must first sign up before you can connect. **You only have to sign up once, no matter how many computers you use in the future.** You can sign up before-hand from any workstation by going to <https://pages.emerson.edu/ecmobile> or from the special "ecmobile-signup" wireless network. This document assumes you are connecting wirelessly to sign up.

I Signup

1. Connect to the wireless network named "ecmobile-signup" (figure 1).

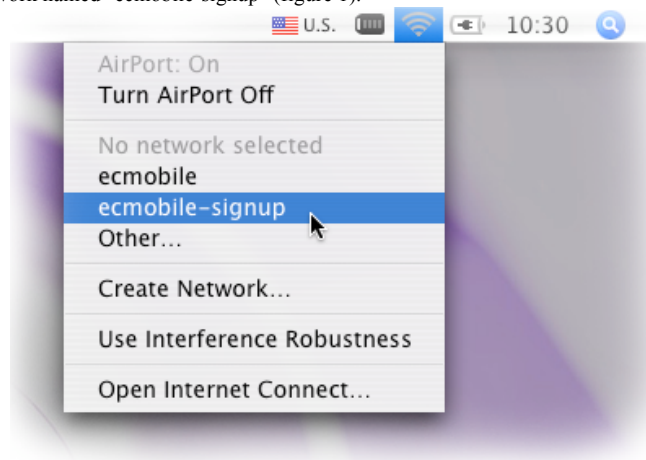

fig. 1

2. Open your web browser. You should be redirected to the ECmobile signup form. If not, go to <https://pages.emerson.edu/ecmobile>
3. Click on the on link on the left to go to the sign up page, read the network usage policy, enter your username and password and submit the form. You are now signed up to use ECmobile.

II Connect

1. Connect to the wireless network named "ecmobile" (figure 2).

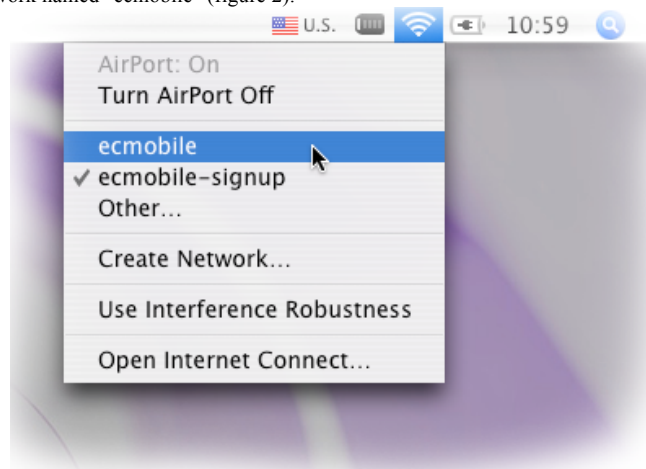

fig. 2

2. A dialog box should appear asking you to authenticate to the wireless network (figure 3). Enter your ECnet username and password and click OK.

fig. 3

3. A prompt asking you to verify the server certificate encrypting the wireless transmission will appear (figure 4). Click continue, or click "Show Certificate", then check "Always trust these certificates", and click "Continue".
